This Action is responsive to the communication filed February 20, 2008.

Claim 16 is withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on May 26, 2006.

Claim 32 is withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on May 26, 2006.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1, 4, 6-7, 11, 25-28, 30 are rejected under 35 U.S.C. 102(b) as being anticipated by Kilayko.

It is believed that the pertinence of the reference is readily apparent. The recitation “for feeding a cleaning fluid to at least one nozzle opening of a nozzle” and further recitations of “cleaning” relate to intended use and are given no weight. Kilayko shows a valve in Figures 1-3 with inlet 12 and outlets 14 and 22, ball 24 controls flow to the outlets and shuts off flow to outlet 22, which corresponds to the recited first path. Ball 24 is read as a slide element in the same manner as ball valves have in past actions.

Applicant's arguments have been fully considered but they are not persuasive. The elected species of Figure 4 does not show a piston valve but a valve similar to the ball of Figure 3. Page 2, lines 26-32, of the specification broadly defines a sliding

element as one displaced "in an axial direction between the valve positions". Ball 24 fairly responds to that definition.

Claims 1, 12, 14, and 31 are rejected under 35 U.S.C. 102(b) as being anticipated by Blank.

It is believed that the pertinence of the reference is readily apparent. The second valve position is shown in Figure 2 by dashed lines. The recitation "for feeding a cleaning fluid to at least one nozzle opening of a nozzle" and further recitations of "cleaning" relate to intended use and are given no weight.

Applicant's arguments have been fully considered but they are not persuasive. As in Kalayko the ball valve of Blank fairly responds to the recitation "slide element". The omission of claim 2 under Blank in the previous action is not determinative of the patentability of the claim as the Office has a policy of avoiding merely cumulative rejections.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
